Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art in view of Kim (US Patent 6,585,388).

With respect to claim 1, Applicant's Prior Art teaches a portable storing device with universal serial bus, comprising:

a housing (Figure 1: 11) being provided at a predetermined position with a through hole (Figure 2: 111), in which an outer mask is fitly mounted;

a housing cap (13) being closed to an open end of the housing; and

a storage unit being (12) located in an inner space defined between the housing and the housing cap, and including a storage circuit board (12), a LED (121), and a USB (right end of the circuit board); and the outer mask (24) to fill up the through hole on the housing and thereby prevent moisture and dust from entering into the housing via the through hole while accurately locate the LED in place in the through hole for easy observation of the LED.

Applicant's Prior Art does not teach an inner cover. Kim teaches the LED (Figure 2: 12) being enclosed in an inner cover (18). Kim also teaches the inner cover (18)

being fitly seated in the outer mask (Figure 4: 2). It would have been obvious to one of ordinary skill at the time of the invention to have the inner cover on the Applicant's Prior Art in the outer mask to add further protect to the LED, as taught by Kim.

With respect to claim 2, Applicant's Prior Art teaches a storage circuit board but does not teach an inner cover. Kim teaches the LED (Figure 3: 12) is fully received in the inner cover (18), and the inner cover is fixedly connected at an open end. It would have been obvious to one of ordinary skill at the time of the invention to have the inner cover on the Applicant's Prior Art in the outer mask to add further protect to the LED, as taught by Kim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zahra Bennett whose telephone number is 571-272-2267. The examiner can normally be reached on Monday-Friday.
